Dear Mr. Weisberg,

Have told Wayne Mayo your message & am enclosing a listing of college presses that I got from the U of Maine. They don't print large volumes from what Pr. Clark said. Thought the list might be of some help.

Hope you are having luck in your endeavor to publish "Post-Mortem."

Have read Epstein, Lane, Buchanan, & your three, & am now on Meagher's book. I'm leaving out Bishop's fantastic fairy tale. It is incredible & impossible that this situation be allowed to continue. The Commission has got to be exposed. Oh - also read Garrison's book "Heritage of Stone" & thought it very good, contrary to what I thought I'd think. It didn't seem far out at all. Wish he'd given more direct quotes & been more specific in places - also that he'd given sources.

Could any court case be undertaken to charge the Commission with conspiracy (to defraud or whatever)? How about a suit to expose the X-rays and/or photos - since it was a govt autopsy, not a Kennedy family project? Perhaps I'm clutching at straws, but can't something be done - legal wise?

Best luck!

Sincerely,
Jerry Ellsworth
